

WELL, THAT WAS FUN... NOW WHAT?

Transform your K-8 classroom into a collaborative spaceship where your class works together to solve high-stakes, standards-based problems -- all at the click of a button. Oh, and did we mention this requires zero prep work from you? That's right. We want to save you time, not add another thing to your already-full plates. **Unlock the future with Mission.io today!**

STEP 1: GET ACCESS

- Scan this QR code (or go to mission.io) and fill out the form to request your Mission.io license.
- We'll get back to you super fast, so you can start exploring our library of 100+ ready-to-launch science, STEM, and math missions as soon as possible.

STEP 2: WATCH THE MAGIC HAPPEN

- Teach your standards like normal.
- Whenever you're ready for a hyper-engaging learning experience that kids will *love*, run a mission.
- Afterward, review our teacher-friendly analytics page to see data about each student's academic performance *and* social-emotional skills.
- Use that data to intervene, extend, and track student growth throughout the year.

Disclaimer: That's it. It really is *that* easy.
